

Rahmat ullah

Full Stack Developer (MERN Stack)

✉ baheer224@gmail.com ☎ 03435185993 📍 Rawalpindi, Pakistan

About Me

Full Stack Developer (MERN) with 2+ years of experience building scalable web applications using MongoDB, Express.js, React.js, Node.js, and Next.js for server-side rendering. Skilled in developing cross-platform mobile applications with React Native and Expo. Proficient in deploying applications on Vercel and managing domains via Namecheap. Experienced in utilizing CI/CD pipelines for seamless deployments. Adept at creating secure APIs, optimizing performance, and delivering responsive, user-friendly interfaces. Proficient in working with SQL databases including PostgreSQL, handling complex queries, data modeling, and integration with backend services. Collaborative in Agile teams, with a focus on delivering high-quality, maintainable solutions that exceed project goals.

Experience

Full Stack developer

06/2025 – Present | Islamabad

Must Services

As a Full Stack developer (MERN) at **Must Service Company**, I developed modern, responsive web applications using **Next.js** and **React**. I focused on building scalable user interfaces, integrating video conferencing solutions, and delivering high-quality user experiences with modern UI libraries.

- Developed responsive web applications using **Next.js** and **React.js**.
- Built modern user interfaces with **Ant Design** and **shadcn/ui**.
- Integrated **Zoom Video SDK/API** for video calling and meeting features.
- Implemented AI-powered features to enhance user experience and productivity.
- Consumed REST APIs and collaborated with back-end developers.
- Optimized application performance, responsiveness, and SEO.

- Wrote clean, reusable, and maintainable code using Git and Agile practices.

MERN Stack

01/2025 – 06/2025 | Punjab, Pakistan

M TECHUB LLC

As a **Full Stack MERN Stack Developer** at **Mtechub**, I developed scalable web applications using the MERN stack, focusing on back-end development, real-time communication, and responsive React-based dashboards.

- Developed RESTful APIs using **Node.js** and **Express.js**.
- Implemented real-time features with **Socket.IO** .
- Integrated **Agora SDK** for live audio and video streaming.
- Managed and optimized **PostgreSQL** and **MySQL** databases.
- Built responsive dashboards using **React.js**.
- Implemented secure authentication using **JWT**.
- Integrated third-party APIs and optimized application performance.
- Collaborated with cross-functional teams using **Git** and Agile methodologies.
- Wrote clean, maintainable, and well-documented code following industry best practices.

Full Stack Developer

06/2024 – 12/2024

ALPHINEX SOLUTIONS

rawalpindi, Pakistan

- Designed and developed dynamic user interfaces using Vue.js, ensuring a seamless and responsive user experience.
- Built and maintained robust back-end services with Node.js and Express.js, integrating APIs and database solutions for efficient data management.
- Leveraged Vuex for state management, enabling optimized performance and maintainable codebases in large-scale applications.
- Deployed applications on cloud platforms, ensuring secure, scalable, and high-performing solutions.
- Collaborated with UI/UX designers and QA teams to deliver user-friendly and bug-free applications.
- Wrote clean, modular, and well-documented code, adhering to best practices and industry standards.
- Implemented version control workflows using Git for efficient collaboration and project management.
- Conducted code reviews and mentoring sessions, promoting continuous learning within the team.
- Applied Agile methodologies to ensure timely delivery of project milestones and deliverables.

React Native / React Native Expo

01/2024 – 03/2025

WQ SOFTWARES

peshawar, Pakistan

- We are seeking a skilled React Native and Expo developer to join our team at WQ Software.
- You will be responsible for building and maintaining high-performance mobile applications for iOS and Android using modern development practices.
- The ideal candidate should have hands-on experience with React Native, Expo SDK, and mobile app deployment processes.

MERN Stack Developer

06/2023 – 06/2024

NAUSALTECH

Islamabad, Pakistan

- Built dynamic, server-side rendered (SSR) and static web applications using Next.js to enhance performance and SEO.
- Designed and developed RESTful APIs for seamless communication between the front end and back end.

- Implemented modern UI/UX designs using React.js with reusable and modular components, improving code maintainability.
- Utilized MongoDB for database management, focusing on schema design, indexing, and efficient query execution.
- Integrated authentication and authorization using NextAuth.js and JWT for secure user access control.
- Deployed applications on platforms like Vercel for scalable and reliable hosting, utilizing CI/CD pipelines.
- Leveraged Next.js features like API routes, dynamic routing, and middleware to streamline development and improve application architecture.
- Collaborated with teams using Agile methodologies, participating in sprint planning, code reviews, and daily stand-ups.
- Ensured code quality by implementing testing strategies with Jest and React Testing Library.
- Optimized application performance through lazy loading, code splitting, and caching strategies.

MERN Stack Developer

KPITB

12/2022 – 03/2023

peshawar, Pakistan

- Complaint Registration: Enabled users to submit complaints online with detailed information and supporting documents.
- Tracking and Notifications: Provided real-time status updates and notifications to users regarding the progress of their complaints.
- Admin Dashboard: Equipped government officials with tools for efficient complaint review, assignment, and resolution tracking.
- Data Analytics: Integrated reporting and analytics for identifying trends and improving service delivery.
- User Authentication: Implemented secure login and role-based access for citizens and administrators.
- Multi-Language Support: Included features to support regional languages, ensuring inclusivity for diverse user demographics.

Projects

Oferta

01/2025 – 06/2025

M Techub Llc

- Tools: Node.js, Express.js, SQL, Socket.IO, Agora, React.js, Redux Toolkit, Material-UI
- User Registration & Authentication: Secure sign-up and login process.
- Ad Posting & Management: Users can create, edit, and delete their listings.
- Search & Filtering: Advanced search with category, price range, and location filters.
- Image Upload: Support for uploading multiple images per listing.
- Messaging System: Direct communication between buyers and sellers.
- Real-time Chat (Socket.IO): Enables instant messaging between users for seamless interactions.
- Live Streaming (Agora): Allows sellers to showcase products or services through real-time video streaming.
- Integrated Payments (Stripe): Secure and reliable payment processing for transactions.
- Push Notifications: Instant alerts for messages, offers, and updates between buyers and sellers.
- Responsive Design: Mobile-friendly interface for easy access on any device.
- Admin Panel: Manage users, ads, payments, and reported content efficiently.
- link: https://play.google.com/store/apps/details?id=com.ofertasvAppMtechub&pcampaignid=web_share 

NausalTech

- Tools: Next.js, MongoDB, Redux Toolkit, Stripe, OpenAI, Tailwind CSS
- Frontend (Next.js, Redux Toolkit):
- Developed a responsive and dynamic UI using Next.js with server-side rendering for fast performance.
- Integrated Redux Toolkit for efficient state management across forms and templates.
- Enabled real-time preview and customization of resumes with clean and modern design.
- Backend (Node.js with Next.js API routes, MongoDB, OpenAI, Stripe):
- Implemented secure user authentication and resume storage with MongoDB.
- Integrated OpenAI API to auto-generate resume content based on user input.
- Set up Stripe for payment processing of premium resume templates and features.

MCare

06/2025 – Present

*Must Services***Tools:** Next.js, Zoom SDK, Redux Toolkit

- Developed a responsive hospital management system using Next.js.
- Managed application state efficiently with Redux Toolkit.
- Integrated Zoom SDK for online doctor consultations and video appointments.
- Implemented online appointment booking for OPD and IPD patients.
- Built patient registration, doctor scheduling, and appointment management modules.
- Developed online medical records, prescriptions, and diagnostic test management.
- Created dashboards for patients, doctors, and administrators.
- Optimized performance, SEO, and user experience with server-side rendering.
- Built reusable UI components and responsive layouts for all devices.
- Collaborated with backend developers to integrate secure REST APIs.

Hantidhowre-FMS (Financial Management System)

11/2024 – Present

Alphinex Solutions

- Tools: Vue.js, Pinia
- Expense Tracking: Developed with Vue.js to allow users to track and categorize their expenses in real-time, improving financial oversight and control.
- Budget Management: Enabled users to create, adjust, and monitor budgets, providing alerts for overages and helping maintain financial discipline.
- Financial Reporting: Integrated powerful reporting tools for generating detailed profit and loss statements, balance sheets, and cash flow reports.
- Invoice Generation: Designed modules for generating, sending, and tracking invoices, ensuring timely payments and smooth transactions.
- Real-Time Dashboard: Built an interactive, data-driven dashboard using Vue.js for instant insights into account balances, financial health, and trends.
- Multi-Currency Support: Implemented multi-currency features, allowing businesses to manage finances across borders with ease.
- User Authentication and Roles: Secured the platform with role-based access control, providing customized experiences and ensuring data security.
- Data Exporting: Enabled users to export financial data in various formats (CSV, PDF, etc.) for further analysis or reporting.

Iyaloja-IMS (Inventory Management System)

10/2024 – 12/2024

Alphinex Solutions

- Tools: Vue js , Pinia
- Inventory Tracking: Built with Vue.js to enable real-time tracking of stock levels, product movement, and restocking alerts.
- Sales Management: Integrated modules to manage sales transactions, generate invoices, and monitor revenue performance.
- Vendor and Customer Management: Added tools to maintain detailed records of suppliers and customers, fostering smooth business relationships.
- Dynamic Reporting: Developed customizable reports for inventory analytics, sales trends, and financial summaries, aiding strategic decision-making.
- User-Friendly Dashboard: Designed an intuitive dashboard using Vue.js for quick navigation and actionable insights.
- Role-Based Access Control: Implemented secure role-based access, ensuring data privacy and controlled access for various user levels.
- Multi-Device Support: Ensured compatibility across desktops, tablets, and mobile devices with a responsive Vue.js interface.
- Seamless Integrations: Enabled integration with third-party tools like payment gateways and accounting software for streamlined operations.

ePOS Stack Management System

06/2024 – 08/2024

Alphinex Solutions

- Tools: Vue js , Laravel , Vuex
- Dynamic Dashboard: Built an interactive, real-time dashboard with Vue.js to provide businesses with insights into sales, inventory levels, and transaction summaries.
- Inventory Management: Developed modules to track stock levels, manage product categories, and generate low-stock alerts, ensuring optimal inventory control.
- Sales and Transaction Tracking: Integrated detailed sales reporting and transaction history features for better financial oversight.
- User Roles and Access Control: Implemented a secure, role-based access system to manage permissions and enhance data security.
- Customizable Reports: Enabled users to generate tailored reports for business analysis, enhancing decision-making capabilities.
- Responsive Design: Ensured the platform is fully responsive and accessible across desktops, tablets, and mobile devices.
- Seamless API Integration: Integrated APIs to connect with third-party services like payment gateways, ensuring smooth transactions.

jaaidad.com

01/2024 – 08/2024

WQ Softwares

- Tools: React Native, Expo, React Hooks, Redux Toolkit
- Developed a cross-platform real estate mobile app for Android and iOS using React Native with Expo.
- Utilized React Hooks for efficient and clean component logic.
- Managed global state with Redux Toolkit for smooth data flow and API integration.
- Implemented responsive UI and optimized performance for real-time property listings.

Ecommerce Web App

01/2023 – 06/2024

University FYP

- Tools: MongoDB , ExpressJs , ReactJs , NodeJs

- Developed a full-stack ecommerce web application as part of the university final year project. The platform allows users to browse, search, and purchase products online. The backend, built with Node.js and Express.js, handles user authentication, product management, and order processing. MongoDB was used as the database to store user information, product details, and order histories. The frontend, created with React.js, provides an interactive and responsive user interface, including features such as a shopping cart, product filtering, and payment gateway integration. Focused on creating a secure, scalable, and efficient platform with an emphasis on user experience, performance optimization, and mobile responsiveness.

IOT

05/2023 – 09/2023

- Tools: Mongodb , ExpressJs , ReactJs , NodeJs
- Developed an IoT-based smart irrigation system designed to automate and optimize water usage for agriculture. The system used IoT sensors (such as soil moisture, temperature, and humidity sensors) to collect real-time environmental data. This data was transmitted to a backend server built with Node.js and Express.js, where it was stored and managed using MongoDB. The frontend, developed with React.js, provided users with a dashboard to monitor soil conditions, water levels, and system performance. Users could also manually control the irrigation system or allow it to operate automatically based on predefined conditions. The project focused on integrating real-time sensor data, providing a responsive and user-friendly interface, and ensuring efficient water usage to improve crop yield.
